

Color Play - What is your Color Way?

How should I glaze this ? What color ? What texture ?

Color: Described by 3 characteristics : hue ,value and intensity.

Hue : The color name; Red, Blue, yellow, etc.

Value: The relative lightness or darkness of a color . (this refers to the gray scale)

Intensity : Purity and of color saturation, bright or dull.

Tint : Color + white

Tone : Color + grey

Shade : Color + Black

Primary Colors : Red, Yellow, Blue

Secondary Colors: Orange, Green , and Violet - made by mixing 2 primary colors.

Warm Colors : Reds, oranges, yellows

Cool Colors : Greens, blues and violets

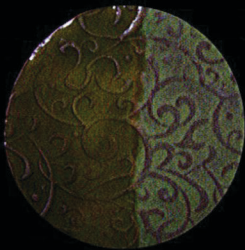

Harmonious Color Schemes :

Monochromatic : using any tint,shade or tone of just one color.

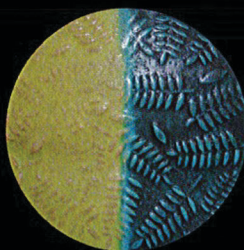

Analogous: colors that are adjacent to each other on the color wheel.

Complimentary : colors directly opposite on the color wheel.

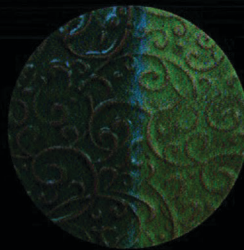

Ceramic Colors are influenced by the chemistry of the glaze and the clay body used. We use our G Mix ^6, an off-white body.
